1

World Vegan Day

Cook a delicious vegan recipe today!

2

About 25% of all insecticides used around the world are used in cotton production.

3

Without habitat, there is no wildlife. It is that simple.

Wildlife Habitat Canada

4

Guess who?

5

Cool fact!

Permafrost, the layer of frozen soil in the tundra, goes down almost 450 metres into the Earth.

6

Warming temperatures can be very bad for hibernating animals. Many wake up early and can't find enough food.

7

8

Cool fact!

The first wind-powered electric generator was invented by Charles F. Brush in 1887.

9

It takes three times as much water to produce a water bottle as it does to fill it.

10

Try to eat five servings of fruits and vegetables every day!

11

Remembrance Day

12

The world's largest maple leaf was found in Vancouver. It measures 44 cm by 34 cm!

13

Deforestation is the destruction and clearing of forests within a region.

14

When it's cold at night put an extra blanket on your bed instead of turning up the heat.

15

Cool fact!

Producing recycled glass uses 21% less energy than using new materials.

16

Riddle:

Where do polar bears keep their money?

Answer:

In a snow bank.

17

Methane produced by cows and sheep is 23 times worse than carbon dioxide in creating climate change.

18

We—human beings—are part of 'biodiversity.' We are dependent on the whole food chain down below us.

Darrell Merrell, heirloom vegetable farmer

19

20

The main cause of deforestation is clearing land for agriculture.

21

World Fisheries Day

Every year about 80 million tonnes of fish are caught, with many fishing areas being overfished. Buy fish that were sustainably harvested.

22

23

Because some places might actually get colder in the future "climate change" is a more accurate term than "global warming."

24

Guess who?

25

Cool fact!

When water freezes its mass increases by 9%.

26

The tallest waterfall in Canada is Della Falls. It's about as tall as an 145 storey building!

27

Rechargeable batteries cost more but save money over time.

28

South Africa is hosting the 17th United Nations Climate Change Conference to talk about what the world will do to fight climate change.

29

30

Environmental activist Severn Cullis-Suzuki started the Environmental Children's Organization when she was nine.

November 2011
